Introducing GREEN CLOUD e-receipt

**Savings. Paperless. Simple.**

Savings. Paperless. Simple.

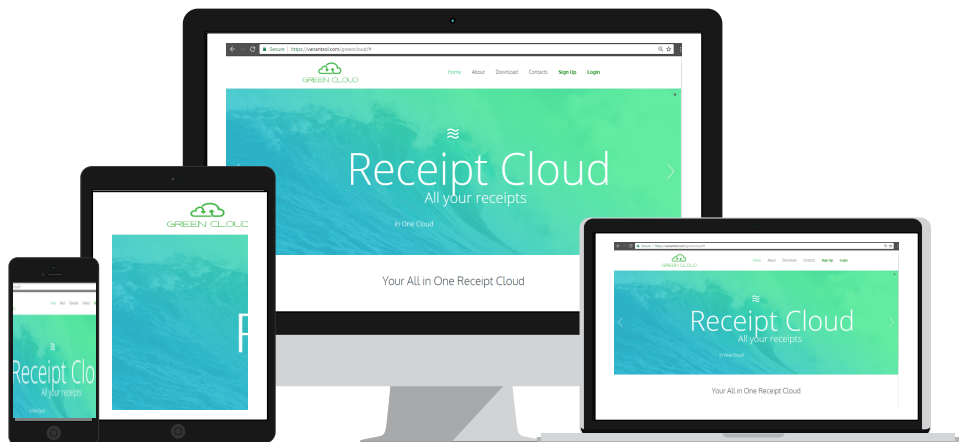

*Are you still printing and filing paper receipts?*

### What if we told you there's an easier way of handling your receipts?

If you would like to save money on printing receipts or wish to go paperless, then GREEN CLOUD Electronic Receipts is the product for you. Most receipts end up in the garbage, which is equivalent to throwing your money away.

With e-receipts, customers' receipts go directly to their inbox so a record will always be available online if they need to access a receipt.

Savings. Paperless. Simple.

## What is GREEN CLOUD?

GREEN CLOUD is an online cloud based, paperless solution developed by IT Specialists with years of experience troubleshooting receipt printers. They understand customers' and merchants' needs and have developed a solution that allows merchants to supply customers with a signed or unsigned electronic receipt.

*“Providers who have started to send receipts electronically have already started saving. They have **NO printer issues** to troubleshoot, **spend \$0.00** on Ribbons, and **\$0.00** on Rolls.”*

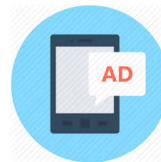

## Bill, sign, save and send to customers

Many of our customers were simply tired of troubleshooting printer problems and needed a cheaper printing solution than a dot matrix or thermal printer while others just needed a paperless receipt solution.

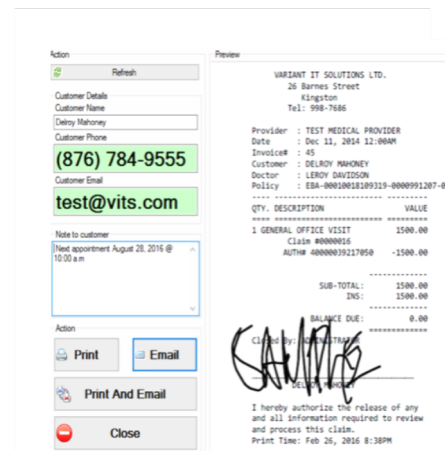

### Additional features include:

- ✓ **Customer loyalty points** - reward your customers for doing business with you.
- ✓ **Quick Feedback** - find out how each customer rates your service
- ✓ **Ad display** - use your tablet or phone to display a new product, service, specials or notice to your customers.

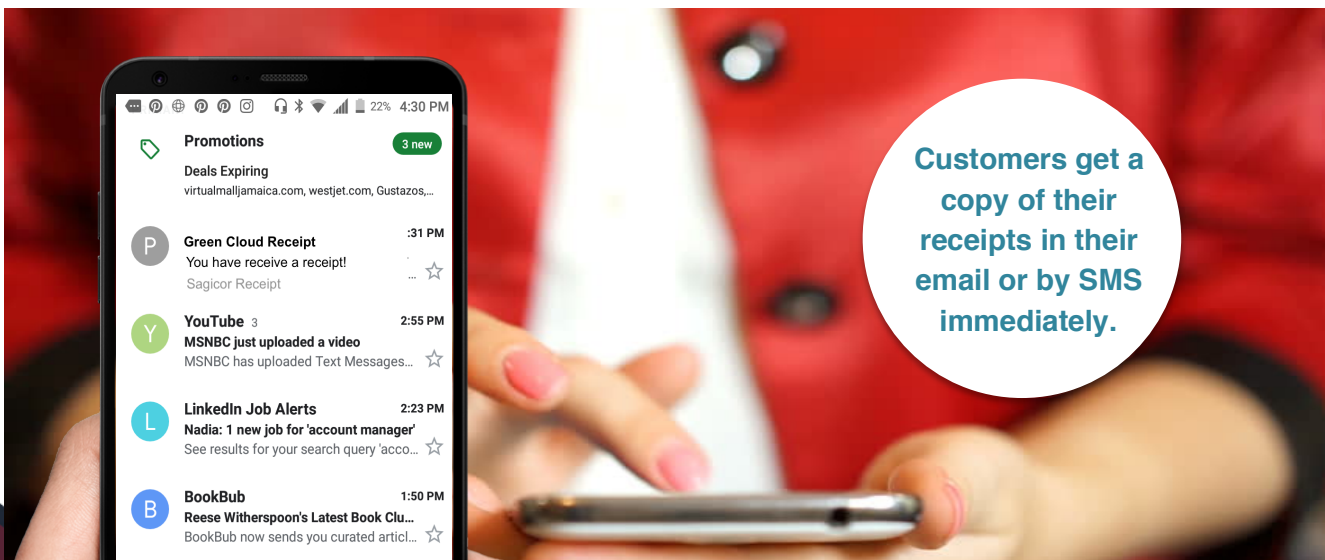

## Smooth, seamless and doesn't interfere with existing programs

GREEN CLOUD software runs in the background and activates when there is a new receipt to be sent.

Records are stored safely in a secure location in the cloud so both **customers** and **providers** can access information wherever or whenever they need to.

## Want to get GREEN CLOUD?

Sign up today and make the transition from paper to paperless

- ✓ Visit us online at [www.variantsol.com/greencloud](http://www.variantsol.com/greencloud)
- ✓ Download the app on Google Play Store
